

Task List

1. I am going to sketch out the overall design of my website will look like first so I have a rough idea and it will be easier to code
2. I will then sketch out each page and where the images will go
3. I am going to write down the codes to what I want my website to look like so I will feel more organized going into it
4. I will spend some time with the design aspect and styling it the emotion I want to evoke
5. I will then scale my images the appropriate size and add a page where you can buy my images
